

## Technical Services

*The Pangborn Customer Technology Center can simulate over 95% of all processes available in the surface preparation industry. It's an invaluable tool for determining equipment and abrasive recommendations.*

*The Customer Technology Center contains a multipurpose room and two large Rotoblast® rooms with multiple, adjustable Rotoblast® wheels, adjustable abrasive flow gates, traversing roof panels, an overhead monorail system, Air Wash and Magnetic Separators and many other unique advantages.*

*Pangborn® Corporation has the broadest line of Rotoblast® wheels in the industry, many of which are on display in the Customer Technology Center.*

## Pangborn Customer Technology Center

*Process testing using the industry's most advanced technology.*

The Pangborn® Customer Technology Center, maintained at our headquarters in Hagerstown Maryland, is a multi-million dollar facility composed of equipment specifically designed for testing a variety of applications including: foundry, descaling, shot peening, plastic, metal, and rubber deflashing. The Center is operated by highly trained Pangborn engineers and technicians and it is available to Pangborn customers for demonstrations and testing of their work.

Using the advantages of the industry's most respected engineering, Pangborn now offers you the use of our Customer Technology Center containing the latest technologically advanced equipment, a comprehensive selection of abrasives, unique and invaluable product attachments, and Pangborn ingenuity.

Since 1904, Pangborn® has led the industry: from the creation of the initial sand blast cleaning process to the development of the industry standard - the Rotoblast® wheel. During this evolution, Pangborn® has worked one-on-one with customers in the Customer Technology Center to design unique solutions and to identify complex surface preparation solutions.

\* Magnetic Equipment Operating -- users of pacemakers and other medical implants need to inform Pangborn® Corporation of their condition prior to visiting.
